OBJECTIVE

I am a student at Bennett University pursuing Computer Science engineering. I am working and learning towards acquiring the best outcome from Under Graduate course. I am highly motivated with a strong foundation in programming languages such as Java, Python, Tailwind with a deep understanding of computer systems ad algorithms. In addition to technical skills, I am also a strong communicator and team player. I have worked on various group projects and have demonstrated excellent collaboration skills. I am always eager to learn and expand my skill set, and constantly explore new technologies and tools.

EDUCATION

Bennett University   Greater Noida
B.Tech Computer Science Engineering   *2020 – 2024*
8.4 CGPA

Pace Science Jr. College   Mumbai
Higher Secondary Education   *2019 – 2020*

WORK EXPERIENCE

Wordpress Developer   Aug 2022 – Sept 2022
TrainerGoesOnline

- Engaged in detailed discussions with clients to understand their specific design needs and project requirements.
- Conducted comprehensive assessments of clients' existing websites, identifying areas for improvement and recommending design enhancements.
- Utilized WordPress development tools, such as themes and plugins, to create visually appealing and functional websites tailored to clients' unique requirements.
- Employed HTML, CSS, and JavaScript to customize themes and templates, ensuring a cohesive and consistent design across all pages.

SEO Intern   Jul 2022 – Sept 2022
Key4You

- Assisted in optimizing website content for search engines, conducted keyword research, analyzed website traffic patterns, and implemented SEO strategies to improve search engine rankings and visibility.
- Participated in developing and executing SEO strategies, including on-page optimization, backlink building, and content analysis, to enhance website visibility and ranking in search engine results.

Web Developer   Sept 2023 – Oct 2023
Honest Design

- Conducted in-depth client consultations to identify design needs and performed thorough assessments of existing websites, recommending targeted design improvements.
- Leveraged WordPress tools and programming languages like HTML, CSS, and JavaScript to create and customize visually appealing, functional websites that meet unique client requirements.

Web/Wordpress Intern   Nov 2023 – Ongoing
Primite Marketing

- Assisted in the creation and maintenance of websites using WordPress, focusing on theme customization, plugin integration, and content management to enhance user experience and functionality.
- Engaged in coding and developing web applications, employing languages like HTML, CSS, and JavaScript, and contributing to various stages of the development lifecycle, from design to deployment.

Languages	:	Python, Java, C++, HTML, CSS, JavaScript
Frameworks	:	Express, Bootstrap, Tailwind CSS
Libraries	:	React.js, Redux, React Router
Databases	:	MongoDB, SQL, Firebase, Node.js
Cloud	:	AWS, Azure, Google Cloud
Dev Tools	:	Visual Studio Code, Git, Github, Figma, Webflow, Balsamiq, Wordpress
Other Tools	:	MS Excel, Postman, SEO

Projects

Admin Dashboard   *React.js, Tailwind CSS, SyncFusion, Material UI*   Source Code

- This app offers a comprehensive toolset, including Theming, Tables and Charts, customizable components, and seamless data management. It has a responsive design, making it accessible and usable on different devices. Users can seamlessly access and interact with the dashboard on desktops, tablets, or mobile devices.

DripShip   *Wordpress: Elementor, Woo-commerce, Wp-Optimize, Jet Pack, Mail Chimp, Forminator*

- This Ecommerce site offers a comprehensive toolset including Theming, Tables and Charts, customizable components, and seamless data management. It is built with a responsive design for accessibility and usability on different devices. Users can seamlessly access and interact with the dashboard on desktops, tablets, and mobile devices, ensuring a smooth experience.

Face Detection Site   *React.js, Face-api.js, Web-Vitals*   Source Code

- The website has a user-friendly interface with features like image uploading, camera access for image processing, and displaying detected faces with overlays or additional information. It utilizes face-api.js, a powerful JavaScript library, to accurately detect and recognize faces in images or live video feeds. The library provides facial landmarks, bounding boxes, and facial expressions for precise face analysis.

ToDo App   *React.js, React Icons, Web-Vitals*   Source Code

- This powerful and user-friendly task management app utilizes React to provide a seamless and responsive user interface. It allows users to efficiently organize their tasks with features like multiple task lists categorized by criteria such as work, personal, or shopping. Users can add tasks with descriptions, due dates, and priority levels to enhance their task management experience.
